
1. PERSONAL DATA

Name: Pagona Maravelaki
Place of birth: Chalkida, Evoia, Greece
Date of birth: 3 December 1960
Nationality: Hellenic
Family staus: Married with two children
Profession: Associate Professor, School of Architectural Engineering,
Lab of Materials for Cultural Heritage and Modern
Building (MaCHMoB), Technical University of Crete
Work address: Akrotiri University Campus
Home address: 1 Pastrikaki St., Chania 73132
e-mail: pmaravelaki@isc.tuc.gr
Web Page: <http://www.elci.tuc.gr/noni/>;
<http://www.arch.tuc.gr/maravelaki.html>
<http://www.tuc.gr/maravelaki.html>

2. EDUCATION

1988-1992: Ph.D. Chemical Science, Department of Environmental Science, Ca Foscari
Unniversity of Venice, Consortium Ferrara-Venezia-Trieste, Italia, 1992.
Thesis Title: Chemical effect of the environment on exposed stone materials and
methods for their conservation.
Part of the thesis was carried out in the Ecole Polytechnique Fédérale de
Lausanne (EPFL), Département des Matériaux, Laboratoire de Conservation de
la Pierre, Lausanne, Suisse, (15/4/91-5/8/91).
1978-1983: B.Sc. Department of Chemistry, National and Kapodistrian University of
Athens.

3. ACADEMIC SCHOLARSHIPS & AWARDS

- 1987-1988: Research Scholarship from the Italian Government to EU citizens. Awarded for postgraduate research studies in the “Centro di studio sulle Cause di Deperimento e sui Metodi di Conservazione delle Opere d'Arte-Consiglio Nazionale delle Ricerche (CNR)”, Florence, Italy.
- 1988-1989: Research Scholarship from the Syremont s.p.a. for postgraduate research studies in the “Centro di studio sulle Cause di Deperimento e sui Metodi di Conservazione delle Opere d'Arte-Consiglio Nazionale delle Ricerche (CNR)”, Florence, Italy.
- 1989-1992: Research Scholarship from the State Scholarships Foundation-IKY. Awarded for doctoral studies in the Department of Environmental Science, Ca Foscari University of Venice.
- 1996-1997: Fellowship of the American School of Classical Studies, Athens, Greece. Awarded for postdoctoral studies on the effects of laser cleaning on marble, in the "Institute of Electronic Structure & Laser", Foundation for Research and Technology - Hellas (FO. R. T. H.), Heraklion, Crete, Greece.
- August 2013: 1st Prize -"Encouraging and Supporting Academic and Research Institutes for Research and Development (R & D) Industrial/R&D Industry, (MED 2007-13)", 2nd Best Researcher Awards Contest, “Ecological nanomaterials for the protection of buildings”, P. Maravelaki, Associate Professor, School of Architectural Engineering, Lab of Materials for Cultural Heritage and Modern Building, Technical University of Crete.

4. RESEARCH & TEACHING INTERESTS

Research interests focus on:

- Study of built heritage, more specifically the weathering and mechanisms of stone decay;
- Technology of historic mortars, pigments and ceramics;
- Cleaning techniques and laser cleaning of black crusts and stains appeared on the monumental facades;
- Assessment of cleaning with micro-destructive and nondestructive analytical techniques;
- Application and assessment of nondestructive spectroscopical techniques for the study of historic building materials;
- Development of eco-friendly and energy efficient plasters for building envelope;
- Development and characterization of novel self-cleaning nanocomposites for the conservation and protection of historic monuments;
- Development of innovative functional building and protection materials (mortars, protective coatings, consolidation materials) based on environmental friendly technological solutions, by incorporating nano-materials within the traditional ones used for restoration.

Teaching interests include:

- Influence of the environment on monuments and buildings
- Decay and conservation of building materials of monuments and architectural surfaces
- Protection and Enhancement of Archaeological Monuments and Sites
- Restoration of Existing Envelopes
- Technology of materials used in buildings
- Principles of Chemistry
- Invited lecturer at the Postgraduate Program of the National Technical University entitled "Protection of Monuments"
- Environmental effect on monuments: mechanisms, restoration methods and assessment, Postgraduate Program TUC.

5. CAREER HISTORY

- 2013-Present: Associate Professor, School of Architectural Engineering, Technical University of Crete.
- 2012-2008: Assistant Professor, Department of Sciences, Technical University of Crete.
- 1997-2008: Employee of the Ministry of Culture, 1st Department of Prehistoric and Classical Antiquities”, Athens, Greece, (1997) and “25th Department of Prehistoric and Classical Antiquities”, Chania, Crete, Greece (1998-2008).
- 1996-1995: Research Associate with the "Institute of Electronic Structure & Laser", Foundation for Research and Technology - Hellas (FO. R. T. H.), Heraklion, Crete, Greece.
- 1995-1993: Research Associate with the Department "Mineral Resources Engineering", Technical University of Crete, Chania, Crete, Greece.
- 1992: Research Associate with "Laboratoire de Conservation de la Pierre", Ecole Polytechnique Federale de Lausanne (EPFL), Lausanne, Switzerland, 1/4/92–31/7/92.
- 1987-1989: Research Associate with "Centro di Studio sulle Cause di Degrado e sui Metodi di Conservazione delle Opere d'Arte", Consiglio Nazionale delle Ricerche, Florence, Italy.
- 1983-1986: Teacher of chemistry to candidates of University in Private Schools, Athens.

6. PUBLICATIONS

6.1 PhD Thesis

P. V. Maravelaki, “Chemical effect of the environment on exposed stone materials and methods for their conservation” (“Effetto Chimico dell'Ambiente su Superfici Lapidree Esposte ed Indagini per un loro Recupero”), Tesi di Dottorato di Ricerca in Scienze Chimiche, IV ciclo, 1992, Universita’ di Venezia, pages 150 (<http://phdtheses.ekt.gr/eadd/handle/10442/4199>).

6.2 REFEREED JOURNAL PUBLICATIONS

- J1. “Laser Induced Breakdown Spectroscopy as a diagnostic technique for the Laser cleaning of marble”, **P. V. Maravelaki**, V. Zafiropoulos, M. Kalaitzaki, V. Kilikoglou and C. Fotakis, *Spectrochimica Acta*, part B, 52, 1997, pp. 41-53.
- J2. “Origin, characteristics and morphology of weathering crusts on Istria stone in Venice”, **P. Maravelaki-Kalaitzaki** and G. Biscontin, *Atmospheric Environment*, 33(11), 1999, pp. 1699-1709.
- J3. “Excimer laser cleaning of encrustation on Pentelic marble: procedure and evaluation of the effects”, **P. Maravelaki-Kalaitzaki**, V. Zafiropoulos and C. Fotakis, *Applied Surface Science*, 148, 1999, pp. 92-104.
- J4. “Sorel’s cement mortars: Decay susceptibility and effect on Pentelic marble”, **P. Maravelaki-Kalaitzaki** and G. Moraitou, *Cement and Concrete Research*, 29(12), 1999, pp. 1929-1935.
- J5. “Investigations on cleaning of black crusted sandstone using different UV-pulsed lasers”, G. Marakis, **P. Maravelaki**, V. Zafiropoulos, S. Klein, J. Hildenhagen, K. Dickmann, *Journal of Cultural Heritage*, 1, 2000, pp. 61s-64s.
- J6. “Compositional characterization of encrustation on marble with laser induced breakdown spectroscopy”, **P. Maravelaki-Kalaitzaki**, D. Anglos, V. Kilikoglou, V. Zafiropoulos, *Spectrochimica Acta, part B*, 56(6), 2001, pp. 887-903.
- J7. “Evaluation of the Initial Weathering Rate of Istria Stone Exposed to Rain Action, in Venice, with X-ray Photoelectron Spectroscopy”, **P. Maravelaki-Kalaitzaki**, R. Bertocello, G. Biscontin, *Journal of Cultural Heritage*, 3, 2002, pp. 273-282.
- J8. “Physico-chemical Study of Cretan Ancient Mortars”, **P. Maravelaki-Kalaitzaki**, A. Bakolas, A. Moropoulou, *Cement and Concrete Research*, 33/5, 2003, pp. 651-661.
- J9. “Short Free Running Nd:YAG laser to clean different encrustation on Pentelic marble: procedure and evaluation of the effects”, **P. Maravelaki-Kalaitzaki**, V. Zafiropoulos, P. Pouli, D. Anglos, C. Balas, R. Salimbeni, S. Siano, R. Pini, *Journal of Cultural Heritage*, 4, S1, 2003, pp. 77-82.
- J10. “Comparative study on the application of the 1st and the 3rd harmonic of a Nd: YAG laser system to clean black encrustation on marble”, G. Marakis, P. Pouli, V. Zafiropoulos, **P. Maravelaki-Kalaitzaki**, *Journal of Cultural Heritage*, 4, S1, 2003, pp. 83-91.
- J11. “Yellowing effect and discoloration of pigments: Experimental and Theoretical studies”, V. Zafiropoulos, C. Balas, A. Manousaki, G. Marakis, **P. Maravelaki-Kalaitzaki**, K. Melesanaki, P. Pouli, T. Stratoudaki, S. Klein, J. Hildenhagen, K. Dickmann, B. S. Luk’yanchuk, C. Mujat, A. Dogariu, *Journal of Cultural Heritage*, 4, S1, 2003, pp. 249-256.

7.4 COLLABORATIONS

1. Pursuant to the official invitation from the Research Institute for the Iranian Cultural Heritage Handicrafts and Tourism Organization (**ICHHTO**), the Professor Dr. Fani Mallouchou-Tufano and the Associate Professor Dr. Pagona-Noni Maravelaki visited Iran from 13/12/2009 up to 21/12/2009. During their visit they gave lectures at the “Isfahan University of Art” in Isfahan (14/12/2009), at the “Research Foundation Parsa Pasargadae” in Pasargadae, and at the “The Research Center for Conservation of Historical-Cultural Works and Objects” in Tehran, Iran, with topics relative to the restoration and conservation of monuments. In particular, case studies concerning the monument restoration of the Acropolis monuments, and other important monuments of Greece, such as the Sikion Theatre, the Olympia archaeological site, the new Museum of Chalkida, etc. Furthermore, the recent advances of the nanotechnology for specific applications in the conservation of materials were presented and discussed. The Iranian scientists expressed particular interesting on the restoration and conservation of the Sassanid period (3rd century AC up to 7th century PC) monuments

in the cities of Firuzabad and Bishapur, including rock reliefs, Temple, Palace and Castle.

2. University of Cyprus, Civil & Environmental Engineering Department, Assistant Professor I. Ioannou, 2011-, Nicosia, Cyprus, Erasmus Agreement, 2011-2014.
3. University Ca Foscari of Venice (IVENEZIA01), Prof. Guido Bisconti and Associate Prof Elisabetta Zendri, Dipartimento di Scienze Ambientali Sede: Polo scientifico via Torino - Informatica e laboratori di Scienze Santa Marta - Dorsoduro 2137 - 30123 (VE), Erasmus Agreement, 2011-2014.
4. Università IUAV di Venezia, Laboratorio di Analisi dei Materiali Antichi, Prof. L. Lazzarini, 2011-παρόν.
5. YSMA, The Acropolis Restoration Service, 2010-present.
6. Universidad de Cadiz, Spain, María Jesús Mosquera Díaz, Departamento de Química-Física, Facultad de Ciencias, Erasmus Agreement, 2013-2014.

7.5 LANGUAGES

Greek (mother language), English (very well), Italian (very well), French (basic knowledge), Spain (basic knowledge).

8. FUNDED PROJECTS (Principal or Co-Principal Investigator and/or Coordinator)

- 2016: “Kommos Archaeological Site / General Condition Assessment”, Institute for Aegean Prehistory Study Center for East Crete INSTAP-SCEC S.A.”, €10,000.
Coordinator
- 2015: First prize at the contest “The Oslo Opera House – Condition analysis and proposal for protection and maintenance of exterior marble”, organized by Statsbygg, Norway. The Oslo Opera House is a listed building of approximately 23 000 m² Carrara Marble that decorates the external facades and roof of the Opera. In this project, Betong Consult AS, NanoPhos SA, the Laboratory Materials and Methods for Cultural Heritage of the Politecnico di Milano and the Surfa Products Scandinavia AS, also collaborate. € 48,000, 2015-2016.
Coordinator
- 2015: Restoration of the Venetian Fortress, Chania, Crete: Study of the construction and repair materials and methods, Greek Ministry of Culture, (€4,000.00).
Coordinator
- 2014-2011: Bioinspired nanocomposites for the strengthening of construction materials, "European Territorial Cooperation", NSRF, Greek General Secretariat for Research and Technology (GRST), (€516,160.00).
Coordinator
- 2014-2011: Sustainability and Compatibility of advanced materials and technologies for the protection of cultural heritage monuments: Development of investigation criteria and methodologies – COMASUCH», [(€600,000.00), European Regional Development Fund and national resources, Thales Project.
Principal Investigator

- 2013-2010: Assessment of mortars with nano-additives for the re-adhesion of porous fragments from the Acropolis, Athens, monuments. The Akropolis Restoration Service, (€6,000.00).
Coordinator
- 2013-2009: Evaluation of chemical compatibility and improvement of stone consolidants with nano-technology. “HRAKLEITOS II”, the European Union-European Social Fund (ESF) & National Sources. (€45,000.00).
Coordinator
- 2012: Physico-chemical analysis of mortars from ancient city of Polyrrenia Chania, Crete, Greek Ministry of Culture, (€4,692.64).
Coordinator
- 2012-2011: Documentation, Principles and Materials Research for the Conservation and Restoration of the Ancient Monuments of Iran, Technical University of Crete, (€6,000.00).
Coordinator
- 2011-2009: Novel nanocomposites for stone consolidation, Technical University of Crete, (€15,000.00).
Coordinator
- 2010-2009: Restoration of the ancient Aptera Theatre, Conservation-Restoration of monuments, Regional Operational Program of Crete, (€14,995.00).
Coordinator
- 2006: Study of the effects of consolidation in the stones of the wall of the Aptera remains in Chania, Crete, Greece, EU-ARTECH, 2006, MOLAB Transnational Access Activities, EU-ARTECH (www-eu.artech.org), “Access Research and Technology for the Conservation of the European Cultural Heritage (FP6-506171)”
- 2005: Integrated tool for in situ characterization of effectiveness and durability of conservation techniques in historical structures (DIAS), DIAS-EVK4-CT-2002-00080, Application to the Fortifications of Aptera, Chania, Crete, Technical University of Crete.
- 2004-2002: Early Metallurgy in Crete, P.E.N.E.D. Project, Ministry of Research and Technology of Greece-GSRT.
Principal Investigator
- 2002-2000: Design and application of compatible mortars for the restoration of the Firkas Fortress, Chania, Crete, Greece, project METAFORA: Mediterranean Towers and Fortresses: Oriented Revitalisation Actions, CULTURA 2000, EC projects.
Principal Investigator
- 1997-1995: Development of new materials for the structural and surface conservation of monuments, based upon studies of the original materials used for their construction, Ministry of Research and Technology of Greece-GSRT.
Principal Investigator
- 1997-1996: Assessment of the consolidation products for the conservation of porous stones from the Rhodes fortifications, National Technical University of Athens, Section of Materials and Engineering, Regional Operational Program of Rhodes.
Principal Investigator

- 1995-1994: Study of decay mechanisms and weathering products of the materials used in the Venetian Fortifications, at Chania, Crete, Greece, Technical University of Crete, RECITE Program, Region of Crete.
Principal Investigator
- 1995: Weathering problems of the materials used for the construction of the Venetian Fortifications, at Heraklion, Crete, Greece”, 1995, Department of Mineral Resources Engineering of the Technical University of Crete, funded by the Ministry of Culture and the Municipality of Heraklion.
Principal Investigator
- 1992: Study on the provenance of yellow stains appeared on constructions of marble in Switzerland, Ecole Polytechnique Federale de Lausanne” (EPFL), Departement des Materiaux, Laboratoire de Conservation de la Pierre, 1992, funded by national foundation of Switzerland.
Principal Investigator
